

# Bolton Buildings Newsletter

## A New Year.

Following a successful year in 2013, this year continues in the same form. With the launch of two new projects during the later part of last year, QB2 and QBMove, both which appeared on channel four, the small homes have created much interest amongst the public, spreading through a large percentage of the countries across the world giving us a busy start to the new year.

Alongside the new ventures, business continues as usual. After completing a large garage situated in the New Forest, work continues for developers across the country, in the form of a Wards Home's site reaching the next phase.

On a different note, with the renovation works completed at the business park where Bolton Buildings are located, it has lead us to expand, taking on another unit to accommodate, both the extra work obtained and the introduction of the Cube Projects, QB2 and QBMove, which are both in production.

*QB2, located near Lewes, East Sussex. It is available for viewing.*

*QBMove, Currently for sale, located at offices in Golden Cross, East Sussex.*

Registered in England and Wales
